OPEN FILE REPORT 90-012

INTRODUCTION

Open File Report 90-012 consists of two index maps showing the locations of 121 published Geological Survey of Canada bedrock geology maps of Nova Scotia, and a set of data sheets giving particulars of each plotted geology map. The index maps and data sheets are compiled from maps available to the end of August, 1990. This open file report does not include the published Faribault - Fletcher geology map series.

The index map is an outline map of Nova Scotia, at a scale of 1 inch to 16 miles (1:1 013 760), with the 1:50 000 NTS map grid on it. Plotted on this map are all the areas that are covered by published Geological Survey of Canada bedrock geology maps. Each outlined map area is numbered, and this number refers to the index map legend. In the legend, for each numbered geology map, the following information is listed: Map Title, Map Scale, Author(s), Publication Date and Reference (map source).

Accompanying the index map is a set of data sheets, one sheet per listed geology map. In addition to the information provided in the index map legend, for each listed geology map the data sheet provides information on NTS map(s) covered, Claim map(s) and Tract(s) covered, the UTM Zone, Eastings and Northings and the Latitude and Longitude of the geology map, the County(s) covered and information on whether the map is for sale in its original published form or only as a white print.

DATA SHEETS FOR PUBLISHED GEOLOGICAL SURVEY OF CANADA BEDROCK GEOLOGY MAPS OF NOVA SCOTIA [EXCLUDING FARIBAULT - FLETCHER MAP SERIES]
